

ANTONINA SHCHERBAKOVA

Cloud Security · Cybersecurity Analyst · AI & Frontend Engineering

+46 762 328 106 | toni.shcherbakova@gmail.com | [LinkedIn](#) | [Portfolio](#) | Stockholm, Sweden

PROFESSIONAL SUMMARY

With a background that combines cloud architecture, security, international law, and AI engineering, I bring a broader perspective to building resilient, compliant, and scalable digital solutions. I'm a results-driven Cloud Security professional with hands-on experience in GCP security architecture, security operations (SecOps), and AI-powered application development.

CORE SKILLS & TECHNOLOGIES

Cloud Security: Google Cloud Platform (GCP), Security Command Center, Google Threat Intelligence, Cloud IAM, Terraform, Kubernetes (GKE), Cloud Networking, Multi-cloud Security

Cybersecurity: Security Operations (SecOps), Threat Detection & Monitoring, Risk Assessment, Vulnerability Management, Cyber Threat Intelligence, Incident Response, Microsoft Sentinel, KQL, GDPR, ISO 27001, NIST, Zero Trust Architecture

AI & Development: Claude API, Model Context Protocol (MCP), Vertex AI, Amazon Bedrock, OpenAI Agents, React, Node.js, TypeScript, Python, HTML/CSS

Tools & Platforms: Google Workspace, Slack, Jira, Confluence, JumpCloud, Git/GitHub, Vercel

Languages: English (Fluent) · Swedish (Limited Working Proficiency) · French (Elementary)

PROFESSIONAL EXPERIENCE

Front-End AI Engineering Intern · [FlyRank AI](#) · 2026 – Present

- Build AI-powered web applications using React, Node.js, TypeScript, and modern AI development toolchains including Claude API and Model Context Protocol (MCP).
- Design, develop, and deploy portfolio-grade projects applying security-by-design principles from initial architecture through deployment.
- Collaborate cross-functionally within an agile engineering team — participating in code reviews, technical learning sessions, and sprint planning.

Cloud Security Intern · [Devoteam](#) · 2025 – 2026

- Support cloud security operations across client GCP environments, contributing to continuous threat monitoring and real-time detection workflows.
- Conduct risk assessments and vulnerability analyses, identifying security gaps and delivering clear remediation recommendations aligned with industry frameworks.
- Contribute to implementation of cloud security controls, secure architecture design, and operational security processes across multi-cloud environments.
- Collaborate with senior security engineers to produce client-facing security reports and compliance documentation.

IT Intern · [ABF](#) · 2023

- Managed GDPR-related compliance documentation and policy workflows, ensuring records remained accurate and audit-ready.
- Provided Level 1–2 technical support including hardware repairs and equipment upgrades; supported IT onboarding and user account administration.

Project & Administrative Coordinator · [Era LTD](#) · 2021 – 2022

- Coordinated multiple concurrent projects end-to-end, owning timelines, deliverables, and stakeholder communication.
- Prepared executive-level reports and presentations; drove website content improvements through cross-functional collaboration.

PROJECTS

J.A.R.V.I.S. Cybersecurity Platform · [2026 – Present](#) ·

- Built a full-stack cybersecurity command center with a holographic, Tony Stark-inspired interface — 8 modules including Dashboard, Attack Lab, Real-time Monitoring, Incident Management, Asset Inventory, and Threat Intelligence.
- Implemented with TypeScript and React, featuring glassmorphism UI, live threat simulation workflows, and WCAG-compliant accessibility standards.

AI Portfolio Risk Terminal · [2026](#) ·

- Designed and deployed a finance AI tool with a live risk engine — Monte Carlo simulations (500 runs), real-time Yahoo Finance market data, and Value at Risk (VaR) calculations at 95% and 99% confidence.
- Built with React and deployed on Vercel; demonstrates applied AI, financial modelling, and interactive data visualisation.

Pink Panther — Website Concept · [2025 – 2026](#) ·

- Designed and built a full website concept with a bold visual identity and modern UI, combining design thinking with frontend engineering.
- Live and deployed — attracted significant traffic on launch, demonstrating ability to design for real user engagement.

EDUCATION

B.Sc. Cybersecurity · **IU International University of Applied Sciences** · 2024 – Present

Scholarship recipient · Network Security, Cloud Security, Ethical Hacking, Cryptography, Digital Forensics, Risk Management.

B.Sc. International Law · **Kyiv International University** · 2019 – 2022

Completed judicial internship at the Court of Appeal, Kyiv (see Volunteer & Leadership).

CERTIFICATIONS & TRAINING

- Google Cloud Platform — 44 completions (2025–2026): Security Command Center, Google Threat Intelligence, Google Security Operations, Model Armor, GKE, Terraform, Cloud Networking, AI & ML on GCP, ACE & PCSE exam prep.
- Anthropic — 15 certifications (Jul 2026): Claude API, MCP (Intro + Advanced), Vertex AI, Amazon Bedrock, Claude Code, AI Fluency, Agent Skills, OpenAI Agents & Workflows.
- Cybersecurity: IBM Introduction to Cybersecurity (2025) · IBM Cyber Attacks & Tools (2024) · IBM We Can Do IT (2024) · Coursera Foundations of Cybersecurity / NIST CSF (2024).
- Training: Microsoft Reactor Stockholm — Refugees in Tech, 100+ hours (2022) · Python Automation, Stockholm stad / Welcome House (2025).
- In progress: pursuing Microsoft Student Ambassador status; running a self-led Microsoft Sentinel / SC-200 learning track covering SOC fundamentals, Defender XDR, and KQL threat hunting.

VOLUNTEER & LEADERSHIP

Youth Ambassador · **Universal Youth Alliance** · 2025 – 2026

- Advanced UN Sustainable Development Goals; contributed expertise at the intersection of cybersecurity, international law, and technology.

Judge's Assistant · **Court of Appeal, Kyiv** · 2021

- Managed court documentation, attended hearings, and developed analytical and case management skills in a high-stakes legal environment.

INDUSTRY EVENTS & CONFERENCES

- Next IT Security Conference — attended as Partner representative for Devoteam; one of the world's most exclusive cybersecurity executive forums (2025).
- Microsoft Reactor Stockholm — Refugees in Tech programme; 100+ structured learning hours in web development (2022).
